Train Tracks Puzzles

16 original logic puzzles with answers, from easy 6×6 to expert 10×10 · Puzzledoku

Free to print and photocopy for personal, classroom and library use.

The rules

- Draw one unbroken track from the arrow on the left edge to the arrow on another edge.
- The numbers on the right and along the bottom say how many squares in that row or column the track passes through.
- The track never branches, never crosses itself and never makes a loop. Every turn is a right-angle curve inside one square.
- Pieces printed on a gray square are fixed and part of the answer. Every puzzle has exactly one answer.

How to mark the squares

- Draw track as a line through the middle of each square, from edge to edge.
- Put a small X in a square you know stays empty, and a dot in a square you know the track passes through.
- Use a pencil on Sheets 3 and 4: the bigger boards sometimes need a what-if you may have to rub out.

First three moves on Level 21 (Sheet 1, page 2)

1. This line is full: Row 1 needs 1 square of track and already has that many. The rest of row 1 stays empty.
2. Look at this square: Row 1, column 1 needs one more connection and only one side is still open. Use it.
3. Fill this line: Row 5 needs 6 squares of track and only that many are still open. They all get track.

Keep going the same way: after every move, check which row, column or square has only one way left.

Contents

Sheet 1: Easy 6×6	Levels 21, 29, 37, 45	page 2
Sheet 2: Medium 7×7	Levels 61, 68, 73, 77	page 3
Sheet 3: Hard 8×8	Levels 111, 129, 138, 140	page 4
Sheet 4: Expert 10×10	Levels 186, 192, 198, 200	page 5
Answers	One page per sheet, in the same order	page 6–9

Every puzzle is a numbered level of Puppy Express, the free train tracks puzzle on Puzzledoku. Open the same level online to check a move or ask for a hint: puzzledoku.com/train-tracks-puzzle/
